Title : IBM Tivoli Identity Manager
V5.1 Fundamentals

Vendor : IBM

Version : DEMO

NO.1 Which two LDAP directory servers are supported by IBM Tivoli Identity Manager V5.1 as middleware components? (Choose two.)

- A. OpenLDAP
- B. Novell Directory Server
- C. IBM TivoliDirectory Server
- D. Sun Enterprise Directory Server
- E. Microsoft Active Directory Server

Answer: C,D

NO.2 A utility company is deploying IBM Tivoli Identity Manager (ITIM) to automate their user provisioning process. During the discovery process they determined that anyone needing the billing application must have approval from the service owner. When the billing application account is modified, a notification must be sent to the user's manager. What must be modified to send the notification to the user's manager?

- A. Add Node under Design Workflows
- B. Modify Node under Design Workflows
- C. Add Operation under Manage Operations
- D. Modify Operation under Manage Operations

Answer: D

NO.3 A health care company is deploying IBM Tivoli Identity Manager (ITIM) to automate their user provisioning process. During the discovery process they determined that anyone needing the Pharmacy application must submit justification which will be stored in the account, and it will require approvals from their manager and the chief of staff. What must be done in ITIM to facilitate the justification and necessary approvals?

- A. Create a new Access Request Workflow using the Simple selection.
- B. Create a new Manage Operations Workflow using the Simple selection.
- C. Create a new Account Request Workflow using the Advanced selection.
- D. Create a new Manage Operations Workflow using the Advanced selection.

Answer: C

- A. browser
- B. database
- C. directory server
- D. application server

Answer: D

NO.6 What is an advantage of the IBM Tivoli Identity Manager V5.1 Self-Service User Interface application?

- A. easy integration with IBM Lotus Domino portal
- B. easy integration with IBM Tivoli Directory Server
- C. easy access to the IBM WebSphere Application Server Web Administration Console
- D. flexibility to change the look and feel of an application specific to a customer's environment

Answer: D

NO.7 A health care company is deploying IBM Tivoli Identity Manager V5.1 (ITIM) to automate their user provisioning process in their environment. During the role discovery process, they determined:- all the doctors need access to the Ambulatory application- only the radiologist needed access to the RIS/PACS application- only cardiologist needed access to the Cardiology EMR What is the simplest way to ensure that the doctors receive the appropriate accounts on the managed resources?

- A. Define the specialist roles, then configure the provisioning policies so that each grants both the Ambulatory and the specific specialist application to the appropriate role.
- B. Define the doctor role, then configure a single provisioning policy that grants access to all applications to the doctor role. Only install the client application on the appropriate specialist's desktop.
- C. Define the doctor role and the appropriate specialists roles. Make the specialists roles a child role of the doctor role, then configure the provisioning policies so that each grants only the specific application to the appropriate role.
- D. Create one provisioning policy that grants access to all applications and define a custom workflow that will check for the doctor's specialization to determine which application(s) should be provisioned. Only install the workflow application on the appropriate specialist's desktop.

Answer: C

NO.8 Which two adapters are available for IBM Tivoli Identity Manager V5.1? (Choose two.)

- A. FTP Client Adapter
- B. HTTP Server Adapter
- C. Web Services Adapter
- D. Active Directory Adapter
- E. Tivoli Access Manager Adapter

Answer: D,E
